The author of this article has decided to have more insight of this research work in this review article.

Keywords: Mental stress, job satisfaction, literature, review paper

Introduction
Review of literature provides in-depth insight of the related research studies conducted. Literature study is basic and primary step of systematic research process in any field. Literature review study guides and directs the researchers regarding the work done and to be done by finding the gaps in prevailing research studies. The researchers are also able to know different results, conclusions and findings of the work done through extensive review of literature of existing studies. This study is also useful to the researchers because it helps him to know about the research methodology, research framework and future scope of the study. This paper is prepared by reviewing various relevant literature studies such as books, research paper, review paper, thesis, and other published organizational reports.

Moreover, researcher has used various research platforms such as scopus database, to download the relevant research article. In this review paper, the researcher has reviewed 11 good quality relevant research papers, review papers and articles which were related to job satisfaction and impact of mental stress on teachers.

Organization of the Article
There have been extensive research studies conducted in the field of Job satisfaction and mental stress. Thus, ample research articles and review papers on job satisfaction and mental stress are available in research domain and also on web resources. In this paper 12 good quality research paper and review papers are reviewed.
